
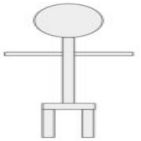
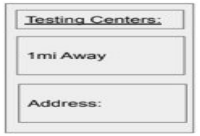
Bill started to feel ill on his way home from work, and noticed he had some symptoms of COVID-19.



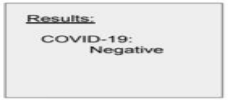


He then checked his phone to find the closest testing center.

After locating the testing center, he got in his car and headed there.

Upon arrival he was tested for the virus, and told to wait 24-48hrs for the results.

Bill then headed home to quarantine until he received the results.

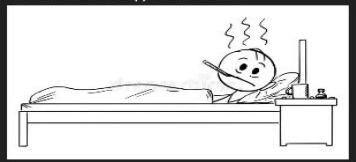


The next day Bill received the results from the testing center, and found out he tested negative and is able to return to his life.

Alex likes to party all the time and especially after colleges started for fall.

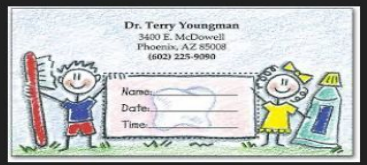
Alex and his group of friends has been breaking the social distancing guidelines.

After the party alex got really sick and used Covid-19 tracking app to use the symptom checker and he was appointed a doctor.

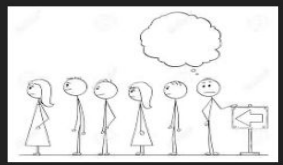


Alex also used the Covid-19 tracking app to schedule an appointment to get tested after his doctors recommendation.

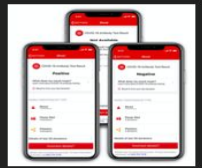
Alex was given an appointment to get tested at the university testing site.

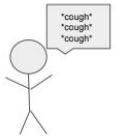


On the day of testing he checked the app to see how long is the wait.

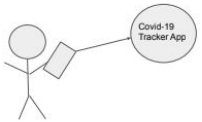


After the test was done alex could see the results using the app.

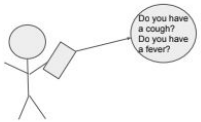




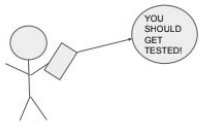
Uh oh, Jack went to a party this past weekend, and now he's starting to feel sick.



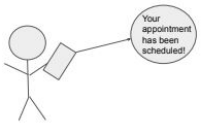
Unsure if this means he should get tested for Covid-19 or not, first he opens the "Covid-19 Tracer App".



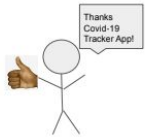
He proceeds to enter what listed symptoms he is currently experiencing to help determine whether he may or may not have Covid-19.



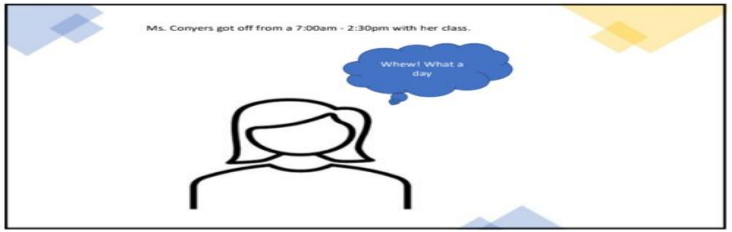
It looks like Jack has a lot of symptoms similar to those of Covid-19. He should get tested!



Luckily for him, the Covid-19 tracker app makes it super easy to schedule an appointment to get tested!

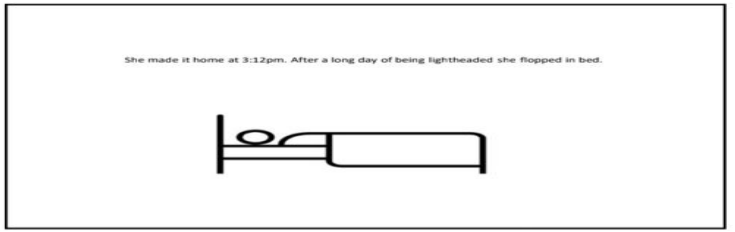


Now Jack is all set to get tested for Covid-19, and all he had to do was answer a few questions on his phone. Thanks Covid-19 Tracker App!



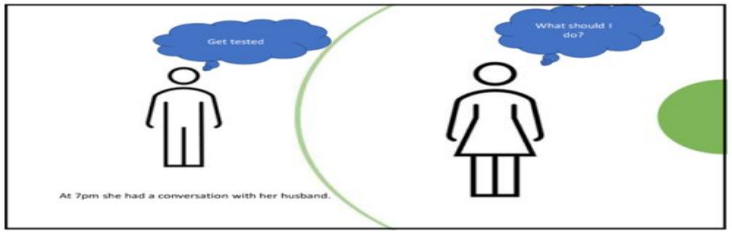
Ms. Conyers got off from a 7:00am - 2:30pm with her class.
Whew! What a day

1



She made it home at 3:12pm. After a long day of being lightheaded she flopped in bed.

2

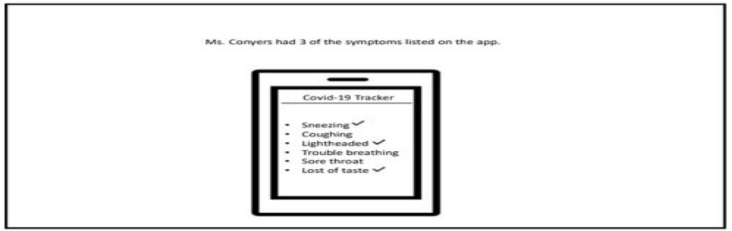


Get tested
What should I do?
At 7pm she had a conversation with her husband.

3

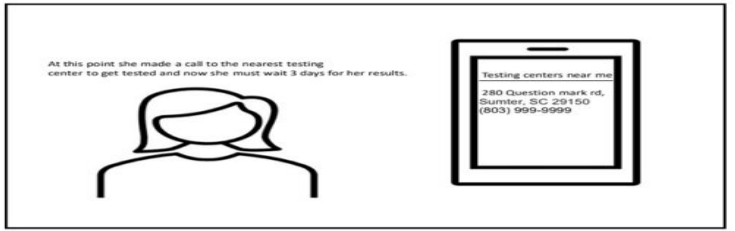
She used the Covid-19 tracker app to check for symptoms.
Covid-19 Tracker App

4



Ms. Conyers had 3 of the symptoms listed on the app.
Covid-19 Tracker
Sneezing
Coughing
Lightheaded
Trouble breathing
Sore throat
Lost of taste

5



At this point she made a call to the nearest testing center to get tested and now she must wait 3 days for her results.
